

PICO Question

Directions:

Please submit your PICO question, background, relevance to MDT, and literature search outcome in the box below.

As a guide for writing your question, please address each of the following items:

PICO question:

Your question should relate to a particular interest you have in a clinically relevant research question with a relationship to MDT. Clearly identify all areas of your question in the PICO format. Provide enough details so that your question is searchable. Your question must be clearly articulated and adequately justified by a literature review of 3-5 articles published in peer-reviewed journals within the last 5 years (Background discussion). Each article must address some aspect of your PICO question. Cite references as a numerical superscript within the text and then please list the complete reference in the reference section below.

MDT relevance:

You need to clearly discuss how the PICO question addresses area(s) of need to the theory or practice of MDT.

Literature search:

Include 3 to 5 articles that provide insight into your clinical question. Address how the answer could impact clinical practice relative to your question.
